

This aerial map shows the building's location within its urban context. The red building is situated at the intersection of Elbgastrasse and Lurper Hauptstrasse. The map includes various shades of gray to represent different building types and textures, as well as black outlines for streets and property boundaries. The red building is centrally located, with a parking area and a small courtyard to its left. The surrounding area includes a mix of residential and commercial buildings, with some green spaces and trees indicated by small circles.

This architectural section drawing illustrates the vertical structure and room layouts of a building. The vertical axis is labeled with floor levels: EG (Erdgeschoss/Ground Floor), 1.OG (1st Floor), 2.OG (2nd Floor), 3.OG (3rd Floor), 4.OG (4th Floor), and 5.OG (5th Floor). The drawing shows a symmetrical arrangement of rooms on both sides of a central vertical axis. Each floor level is clearly delineated by horizontal lines. Rooms are separated by vertical walls, and doors are indicated by small rectangular openings with inward-pointing arrows. Windows are shown as vertical rectangular openings, some with internal shading to represent glass panes. Human figures are placed in various rooms to provide a sense of scale. The ground floor (EG) features larger rooms, possibly entrances or public spaces, while the upper floors (1.OG to 5.OG) consist of smaller, more uniform rooms. The drawing is a technical line drawing, typical of architectural plans, with no shading or color.
