## UTZ, INNOVATIONSZENTRUM FÜR UMWELTTECHNOLOGIE BERLIN-ADLERSHOF

The planning of the outside of the “Innovation Centre for EnvironmentTechnology” in Berlin-Adlershof is in line with the building concept. The five-story, meandering building complex is surrounded by a 20m-wide courtyard for users of the Centre as well as the public. It is divided by a North-South axis perpendicular to the building axis. The courtyard design picks up the surrounding spatial references.
