

Koordinationsmodell

This 3D model shows a multi-story building with various systems integrated into its structure. The building is rendered in a light gray color, and the internal systems are shown in a semi-transparent manner. The systems include a complex network of pipes, ducts, and electrical conduits, all color-coded to represent different functional areas. The building is situated on a platform with tracks, and the surrounding area is a light gray plane.

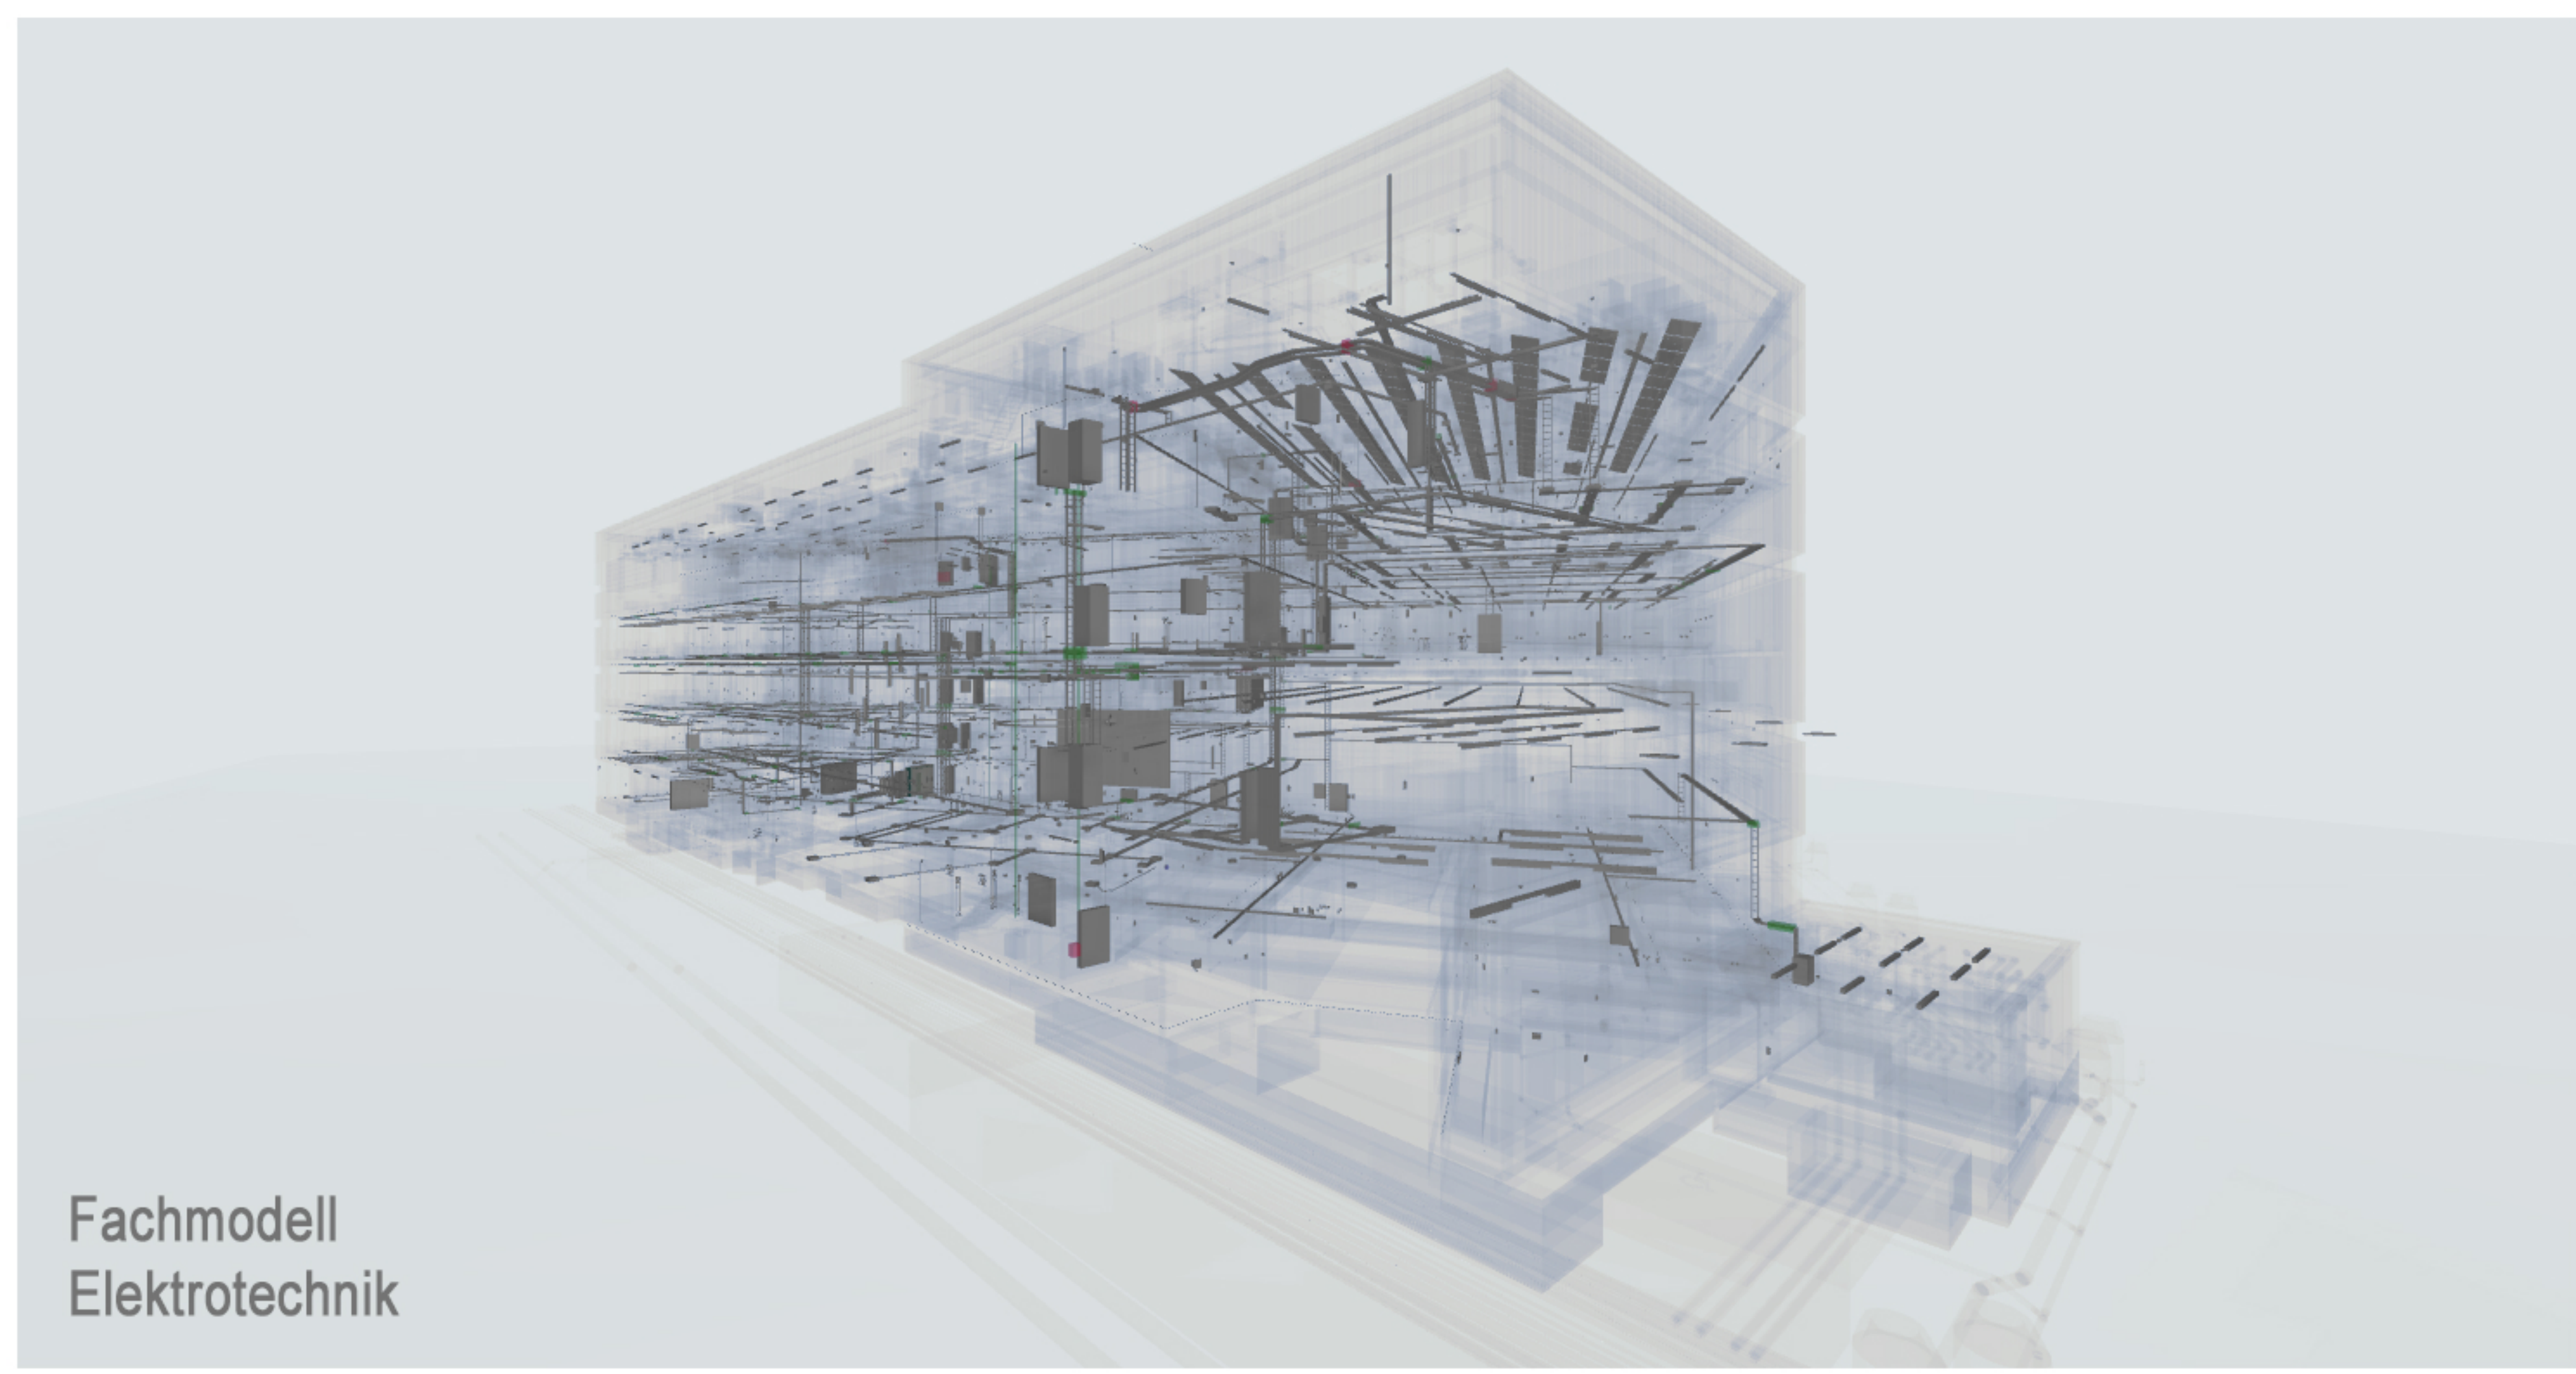

Fachmodell
Architektur

This 3D architectural model shows a multi-story building with a complex, stepped facade. The building is rendered in a light gray color, and the internal structure is visible through the semi-transparent walls. The building is situated on a platform with tracks, and the surrounding area is a light gray plane.

Fachmodell
Heizung Lüftung Sanitär

This 3D model shows a multi-story building with a complex, stepped facade. The building is rendered in a light gray color, and the internal structure is visible through the semi-transparent walls. The building is situated on a platform with tracks, and the surrounding area is a light gray plane.

Fachmodell
Elektrotechnik

This 3D model shows a multi-story building with a complex, stepped facade. The building is rendered in a light gray color, and the internal structure is visible through the semi-transparent walls. The building is situated on a platform with tracks, and the surrounding area is a light gray plane.
