## Trebbin OT Glau (Friedensstadt)

### Elke (former resident):

- “The windows were not properly sealed and in summer the apartment became very hot.”
- “You had to do a lot of repairs yourself, but you also found support within the house.”
- “In the summer it is so beautiful, everything is blooming green, yellow, red, blue. I know many people who enjoy it very much and would like to move here”
- “Living so close here, even though you’re in the countryside helped our relationship: it was nice that my two daughters could get an apartment above and next to me. Everyone had their own private space like that, only we would have liked to have a common room.”

### Jens-Uwe (property management Johannische Kirche)

- “The first prefabricated building was demolished, although it was discussed and planned for years what could happen to it. We want to avoid this with the other prefabricated building”
- “With new buildings, you can’t get below €10 net cold rent at the moment with the high construction prices.”
- “I would like to see additional functions in the project, such as a non-profit coffee shop or a repair workshop, something that has a certain charisma and has an impact on the public space.”

### Jörg Meyer (former resident)

- “I would never have dreamed of helping out myself. However, the circumstances have led to the fact that we have done a lot ourselves and I must say: It was great fun.”
